

The weather report

Here is the UK weather report for 5 days:

This Evening and Tonight: We have a dry and clear night ahead of us. Some mist and low clouds are expected in the east during the early hours. It will be a warm night in towns and cities, but cooler in the villages.

Thursday: There is some possibility of low misty clouds in the morning. They will move to the north coast and leave another fine, dry and sunny afternoon. It might be cloudier in the extreme north. Another hot day for many.

Outlook for Friday to Sunday: Mostly dry and sunny, but not so warm. It will turn cloudier in the north with perhaps some rain on Sunday. There is also risk of thunderstorms, so don't forget your umbrellas!

Answer the questions.

- 1) Which two days is the woman in the photo probably looking at?
- 2) Which days are best for doing the laundry?
- 3) When do you not need an umbrella?
- 4) Which one is good for your garden?
- 5) What day would you choose for an outdoor party? How about a football match?
- 6) Why are cities usually warmer than villages?
